Cybersecurity Professional | VAPT & Threat Intelligence

Core Competencies: VAPT | Threat Intelligence | OSINT | API Security | Detection Engineering | Technical Writing

PROFILE SUMMARY

Cybersecurity professional with hands-on experience in VAPT (web application security testing) and OSINT-based threat/phishing investigation. Certified API Security Associate (Wallarm), with practical exposure to vulnerability assessment, IOC analysis, and MITRE ATT&CK-mapped threat detection. Actively writes technical security content and recently participated in an AI & security hackathon building a cyber-safety awareness tool. ISC² CC and Google Cybersecurity certified; CEH in progress. Strong written communicator, experienced in producing structured vulnerability and investigation reports.

TECHNICAL SKILLS

- **VAPT:** Burp Suite, OWASP ZAP, OWASP Top 10, Web Application Security Testing, API Security
- **Threat Intelligence / OSINT:** IOC analysis, domain/DKIM/SPF investigation, MITRE ATT&CK, VirusTotal, Recon-ng
- **Malware Analysis:** Static and advanced static analysis (.apk)
- **Network Security:** Wireshark, Nmap, IDS/IPS, TCP/IP, Firewall configuration
- **Tools:** Splunk, Wazuh, Kali Linux, Python, Bash

CERTIFICATIONS

API Security Certified Associate, Wallarm, February 2026 • Certified in Cybersecurity (CC), ISC², December 2025 • Google Cybersecurity Professional Certificate, September 2025 • CEH (in progress), Expected September 2026

EXPERIENCE

Cybersecurity Architecture Research Intern | iTelematics Software Pvt Ltd (EV.ENGINEER™) — July 2026 – Present

- Built the backend, database, and simulation logic for a Cyber Attack Simulator using AI-assisted development, modeling attacks like telemetry spoofing, replay attacks, and BMS intrusion
- Performed static and advanced static analysis on .apk malware files

Cybersecurity Intern | Redynox Cybersecurity Solutions — February 2026 (1 Month)

- Tested OWASP WebGoat for SQLi, XSS, and CSRF; documented findings with PoC and remediation steps
- Built a network lab (Ubuntu + Kali); analysed traffic in Wireshark and configured firewall rules

PROJECTS

Cybersecurity Literacy — AI-SEC Hackathon | AI-SEC Community, Manipal Academy of Higher Education | September 2026

- Participated in a team hackathon focused on AI & security, building a basic working prototype of a cyber-safety layer to demystify security concepts and promote proactive, AI-aware security habits for non-technical users

SOC Detection Lab — Wazuh & Sysmon | Independent Research

- Built a hands-on SOC detection lab using Wazuh, Sysmon, and a Windows 11 endpoint; developed custom detection rules mapped to MITRE ATT&CK

OWASP Juice Shop — Vulnerability Assessment (VAPT) | February 2026

- Exploited Auth Bypass, IDOR, and XSS; produced a formal VAPT report with OWASP Top 10 mapping and impact analysis

Network Recon & Phishing Investigation | December 2025

- Footprinted open services and vulnerabilities using Nmap and Recon-ng; analysed 10+ phishing emails for spoofed domains, DKIM/SPF failures, and IOCs

EDUCATION

M.Tech — Structural Engineering | Aditya Engineering College (A), Kakinada — 2022–2024

B.Tech — Civil Engineering | Aditya Engineering College (A), Kakinada — 2018–2022
